Uma Pequena Historia

A historia dos pesos HSdrop começou por uma procura pessoal.

Sempre procurei no material que uso na caça submarina, a qualidade, o conforto e a funcionalidade.

Sendo o sistema de lastro uma parte fundamental no equipamento de caça submarina, os pesos que conseguia adquirir em Portugal, ou não satisfaziam as minhas exigências, ou simplesmente estavam fora do meu orçamento.

Com este constrangimento e desafiado por alguns companheiros de caça, comecei a desenvolver a ideia de uns pesos hidrodinâmicos, confortáveis e de pequenas dimensões.

Com a colaboração de diversas pessoas, desde o inicio, foi procurada uma forma única no mundo.

Proveniente dos feedbacks dos utilizadores a forma dos pesos HSdrop tem sofrido uma evolução continua, procurando satisfazer as mais exigentes necessidades.

A Small Story

The story of the Weights HSdrop began with a personal search.

Always tried in the material that i use in spearfishing to have quality, comfort and functionality.

Being the ballast system a fundamental part in the spearfishing equipment, the weights which i could acquire in Portugal, or didn't satisfy my requirements or simply were out of my budget.

With this embarassment and with the challenged of some companions.

I began to develop the idea of a hydrodynamic weight, comfortable and of small dimensions.

With the collaboration of various people, since the beginning, was sought a unique shape in the world.

From the feedback of users, the shape of HSdrop weights has suffered an continues evolution, seeking to meet the most demanding needs.
